### Input devices

-  **Headset Microphone**  
HyperX Virtual Surround Sound

Disabled

-  **Stereo Mix**  
Realtek(R) Audio

Enable

1.

### Select playback device

- Speakers (Realtek(R) Audio)**
- Realtek Digital Output (Realtek(R) Audio)
- LS32A600N (NVIDIA High Definition Audio)
- Headset Earphone (HyperX Virtual Surround Sound)

  20

1. **Enable** Stereo Mix in:

Settings >> System >> Sound >> Manage sound devices

If Stereo Mix isn't visible install sound driver properly.

2. Make sure you've right audio device **connected** to your computer and **selected** in Windows playback device options over Realtek Audio (or another Stereo Mix provider)

3. Make sure you've both beat-visualiser.exe & icon.png in **one folder**, otherwise the app won't work.

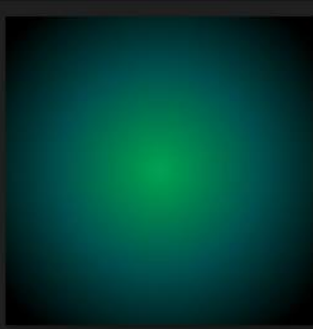

4. **Start** beat-visualiser.exe, **play** some music and **enjoy!**

Controls:

```
Q Previous song
E Next song
>|| Resets max/min beat range
A Changes background color
S Swaps between full and shaded circle
D Changes color (randomly)
```

beat-visualiser.exe
